

LabVIEW Library for ALP Controller Suite

This LabVIEW library provides a high-level interface for interacting with the ALP dynamic-link library (DLL). Designed specifically to simplify access to the ALP API, this library allows LabVIEW users to control Digital Micromirror Device (DMD) hardware from ViALUX, while abstracting the complexities of direct DLL interaction.

Features

- LabVIEW 2012 or later (32-bit and 64-bit)
- Support for ALP-4.2, 4.3 and 4.4 (32-bit and 64-bit)

Rev.-Nr.: P-25-02-221
