CONTACTLESS · PRECISE · DIGITAL

BodyLux® LiNK

BodyLux® LiNK is the mobile extension to the BodyLux® 3D scanning system and enables the location-independent data acquisition of **skin and traction measurements**. Customer data and manual measurements, also during home visits, are recorded in the BodyLux® LiNK tablet and transferred directly to the BodyLux® software. Thus the entire range of the system is available for fast digital processing of the ordering process.

What does BodyLux® LiNK include?

- Tablet computer - Android or iOS
- App for recording and transferring the data into the BodyLux® software

What are the requirements for use?

- Tablet with BodyLux® LiNK app installed
- A BodyLux® PC with installed software is required for further processing of the order

What are the options for completing the order?

- **Creation of order sheets**
Order sheets from 15 manufacturers for compression stockings are stored in the system
- **Online shop connection**
Direct data export to the online shops of Juzo, medi, BELSANA, COMPRESSANA, and THUASNE as well as data exchange to Schiebler is possible
- **Industry software connection**
Export of order sheets and xml-data to SaniVision, TOP M, acriba Direkt, OT WIN, opta data, and mmOrthosoft®
